Subject: Sequence search request 10/709691

8/24/07

Re: 10/709,691

Please perform the following searches in the above application:

1. A length limited search of nucleic acid sequence SEQ ID NO:348, with lower and upper limits of 15 and 200 nucleotides respectively.
2. A length limited search of nucleic acid sequence SEQ ID NO:4,233,864, with lower and upper limits of 15 and 200 nucleotides respectively.

Also, I am unable to view either of these sequences in eDNA or the SCORE Home Page to 1) confirm whether they are RNA or DNA or both and 2) to verify that one is contained within the other as required by the claim.

It would be nice to have access to these sequences immediately so that I can at least begin searching the sequences myself in EAST and Registry and start the preliminary examination. This case is a 1+ on my amended docket.

Please reply to all.

Thanks,

Louis Wollenberger

Subject: FW: 10/709691--I'll be off

Exr. Wollenberger:

FYI: I'll be out on Friday, 8/24--Mark Spencer will be here. If a search will be done on the two sequences for 10/709691, I've given Mark a floppy disk with the 2 seqs. on it. You can contact him.

Have a great weekend.
